PLASTIC & AESTHETIC SURGERY

MENU OF

Aesthetic Services

Welcome

Our aesthetic services are customized based upon your individual needs. Our expert medical aesthetician will consult with you to create a customized treatment plan to best suit your needs and goals. Many treatments require more than one session to obtain optimal results. In addition to the single treatment price, we do offer series pricing at a discount which can be discussed at any time with one of our Patient Care Coordinators. All treatments must be paid in full prior to scheduling. We do accept Care Credit as a financing option.

Services Include:

Facials

Radiance Facial \$100

This customized facial suits all skins need by cleansing, dual exfoliating and masking to purify, brighten and hydrate the skin. Relax while you rejuvenate, preserve and protect the skin with these medical grade products from Revision skincare. This treatment includes dermaplaning, will leave your skin smoother and free of vellus hair and is a great way to maintain other resurfacing or broad band light treatments.

DiamondGlow Facial \$200

25-minute treatment

Brighten, hydrate, and purify the skin with this next-level skin resurfacing that simultaneously exfoliates, extracts, and infuses a serum suitable for specific skin conditions and needs. This noninvasive treatment is intended for the face, around the eyes, lips, and body. Your skin will be left luminous, nourished, and renewed. This medical grade facial is also a great addition to upkeep injectables and has a unique technique to keep lips plump. Relax, renew, and detox your skin to reveal your best glow yet!

DiamondGlow Signature Facial \$275

50-minute treatment

Relax longer and glow further by treating face, neck and Decolletage to reduce sun damage, dehydration lines, and uneven skin texture all around. Enjoy an arm, Decolletage and scalp massage while eye masking to reduce puffiness and tired looking eyes followed by an uplifting eye treatment. Get glowing while looking more rested with this signature treatment.

DiamondGlow Body Treatment \$300

75-minute

Glow from head to toe! Help clear, brighten and smooth skin from acne, pigmentation and uneven texture due to sun pollution and other triggers over the years while preventing further damage. The body deserves to glow just as much as the face!

Medical Skin Peels

Illuminize Peel \$60

For mild skin imperfections. Brightens overall appearance with no down time. Leaves your skin looking radiant. A MUST before any special event.

Vitalize Peel \$125

For mild to moderate skin imperfections. Addresses fine lines, wrinkles, and roughness. Noticeable results after just one peel, compelling results after 3-6 treatments.

Rejuvenize Peel \$175

For moderate to severe skin imperfections. Addresses fine lines, wrinkles, and roughness. Noticeable results after just one peel, compelling results after 3-6 treatments.

Body Peels \$125/ area

Blended, self-neutralizing peels to help brighten, smooth and clear skin on the body. These peels are great for improving hyperpigmentation, keratosis pilaris, and acne on the body with little to no downtime. Best results occur when treated in a series of 3 to 6 sessions.

Laser Skin Services

Forever Clear Acne BBL \$200

Broad Band Light (BBL) is the most powerful Intense Pulsed Light (IPL) device that delivers light energy deep into your skin to help treat acne, leaving you with clear, healthy, radiant skin. This is a cutting-edge treatment that uses the power of light to comfortably and effectively clear acne without creams or medicine. A series of 6 treatments is recommended with bi-weekly appointments.

BBL Photo Rejuvenation \$350

Sciton BBL aids in cell turnover, stimulate elasticity, slows down aging reconditions skins texture and color. Any area of the body can be treated, but most commonly on the face, neck, back of the hands, chest, and shoulders.

Hands \$150/session

Full arms \$450/session

Back \$450/ session

Legs \$600/session

Decolletage \$250/session

HALO with PRP \$1200

Get that HALO glow with this hybrid fractional laser. HALO precisely targets years of skin damage and the visible signs of aging. If you are concerned with wrinkles, discoloration, sun damage, uneven skin tone, enlarged pores or poor elasticity and texture, then this is the treatment for you. HALO combines a deep dermal revitalization with epidermal renewal. This hybrid technology gets the job done without the painful, long recovery times from many other laser treatments. You can wear make-up the day after your treatment.

HALO PLUS! \$1800

This enhanced combination laser treatment consists of a HALO laser treatment followed by an additional erbium laser treatment designed to penetrate deeper to improve sun damaged skin and fine lines leaving you with an even more enhanced result! Depending upon the depth of the treatment, you can apply makeup in 1-4 days.

Full Ablative Resurfacing \$2500 - \$5000

Full-face resurfacing performed by Dr. Epstein. More aggressive and deep resurfacing for deep lines and wrinkles. Maximal rejuvenation of skin with tightening. Anticipate 7-10 days of downtime. The best solution for the most sun damaged skin.

Profractional Resurfacing Laser

For targeted areas on the face. An Ablative fractional LASER treatment that generates new collagen and elastin for acne scars and deeper wrinkles. Great for the cheeks, around mouth, forehead, and crow's feet. It treats a "fraction" of the skin so it can go deep without a lot of down time while targeted harder to treat areas with the HALO or BBL. It is also a great addition to HALO and BBL treatments. Best results when treated in 3 sessions.

Small area on face \$300/treatment

Medium area \$500/treatment

Large area \$850/ treatment

Forever Bare- Laser Hair Removal

Next level laser hair removal. No more shaving, waxing, or tweezing. This is a gentle and effective BBL energy that heats the hair follicle and causes it to stop producing hair without harming the surrounding areas. Any part of your body can be treated, most commonly face, under arms, legs, bikini area, chest, shoulders and back. Most areas require 6 treatments at 4-6-week interval for optimal results.

Small area (lip, under arm) \$750 series of 6

Medium area (bikini, full face) \$1000 series of 6

Large area (abs, back, Brazilian, chest) \$1500 series of 6

Full leg \$2500 series of 6

Arm/half leg \$1250 series of 6

Laser Scar Treatment

BBL energy and resurfacing laser treatment is used to reduce a raised scar and help with pigmentation.

Small scar (up to 2") \$1250 series of 6

Medium scar (up to 4") \$1750 series of 6

Large scar (4" +) \$2500 series of 6

Non-Invasive Procedures

CoolSculpting Pricing varies by area.

CoolSculpting is an FDA-cleared device that melts fat cells by targeting them with freezing temperature. The fat-dissolving process is referred to as cryolipolysis. CoolSculpting is an excellent body-sculpting option for men and women who are at or near their ideal weight and have excess fat around abdomen, flanks, chest, neck, arms, and inner/outer thighs. CoolSculpting is not intended for weight loss. Our Medical Esthetician will evaluate you and then develop a treatment plan that will focus on your goals and desires.

CoolTone Pricing varies by area.

This nonsurgical, noninvasive treatment is intended for focused, controlled muscle contractions that tone and sculpt the body. CoolSculpting freezes fat, CoolTone tones muscle. Adults who currently engage in healthy habits that support weight and general fitness are typically good candidates for CoolTone. CoolTone is FDA cleared to treat the legs, arms, buttocks, and abdomen.

Hairloss treatment with PRP \$600

PRP or platelet-rich plasma, is injected into your scalp to promote new hair growth. The PRP stimulates stem cells and other cells in the microenvironment of the hair follicle. This helps the hair follicles that have become dormant or inactive to return to the active growth phase of the hair growth cycle. We recommend a series of 4 treatments for optimal results.

Morpheus8 RF Microneedling with PRP \$1500

Morpheus 8 combines microneedling and radio frequency to achieve deep fractional remodeling. The Morpheus 8 doesn't just address superficial tissue; it directs energy toward the adipose fat that is notorious for creating jowls, bra rolls and more. Microneedling with radio frequency treats both the epidermis and the dermis for maximum results. This minimally invasive technique is ideal for patients that wish to address acne or acne scarring, poor skin texture, sun damage, deep lines and creases, mild or sagging jowls, enlarged pores and stretch marks. A series of 4 treatments is recommended for optimal results.

Votiva \$3500 series of 3

This non-surgical treatment is routinely performed to address the common concerns women experience, including vaginal dryness, laxity, atrophy and urinary stress incontinence. The device combines gentle volumetric heating with fractional tissue coagulation to achieve optimal results with minimal downtime. Votiva addresses concerns both internally and externally, all without surgery and its inherent risks. This is done in a series of 3 treatments with recommended yearly maintenance.

Skin Care Products

MDEsthetics

A product line created by Mark D. Epstein, MD FACS and customized by our medical aesthetician to meet each patient's specific skin needs.

SkinMedica

We highly recommend the use of medical grade SkinMedica skin care products to keep your skin hydrated and vibrant daily.

Revision

Revision skincare has a unique formulation philosophy to achieve youthful-looking skin without compromising the skin's long-term health. Revision's delivery systems allow high concentrations of ingredients to be delivered into deeper layers of the skin without compromising the skin and causing inflammation. Revision skincare is best for anti-aging regimens and specialize in skincare for harder to treat areas such as the neck, décolletage, hands and body.

EltaMD

EltaMD specializes in sunscreen that offers the proper protection for all different skin types and conditions leaving the skin with a healthy glow. EltaMD is especially formulated with zinc oxide and all different SPF's and has options that are non-comedogenic and light weight on the skin making the everyday sunscreen routine more comfortable. Receive optimal results post procedure with EltaMD products to ensure proper healing.
